

HUNGER IN AMERICA

Ann Rumsey

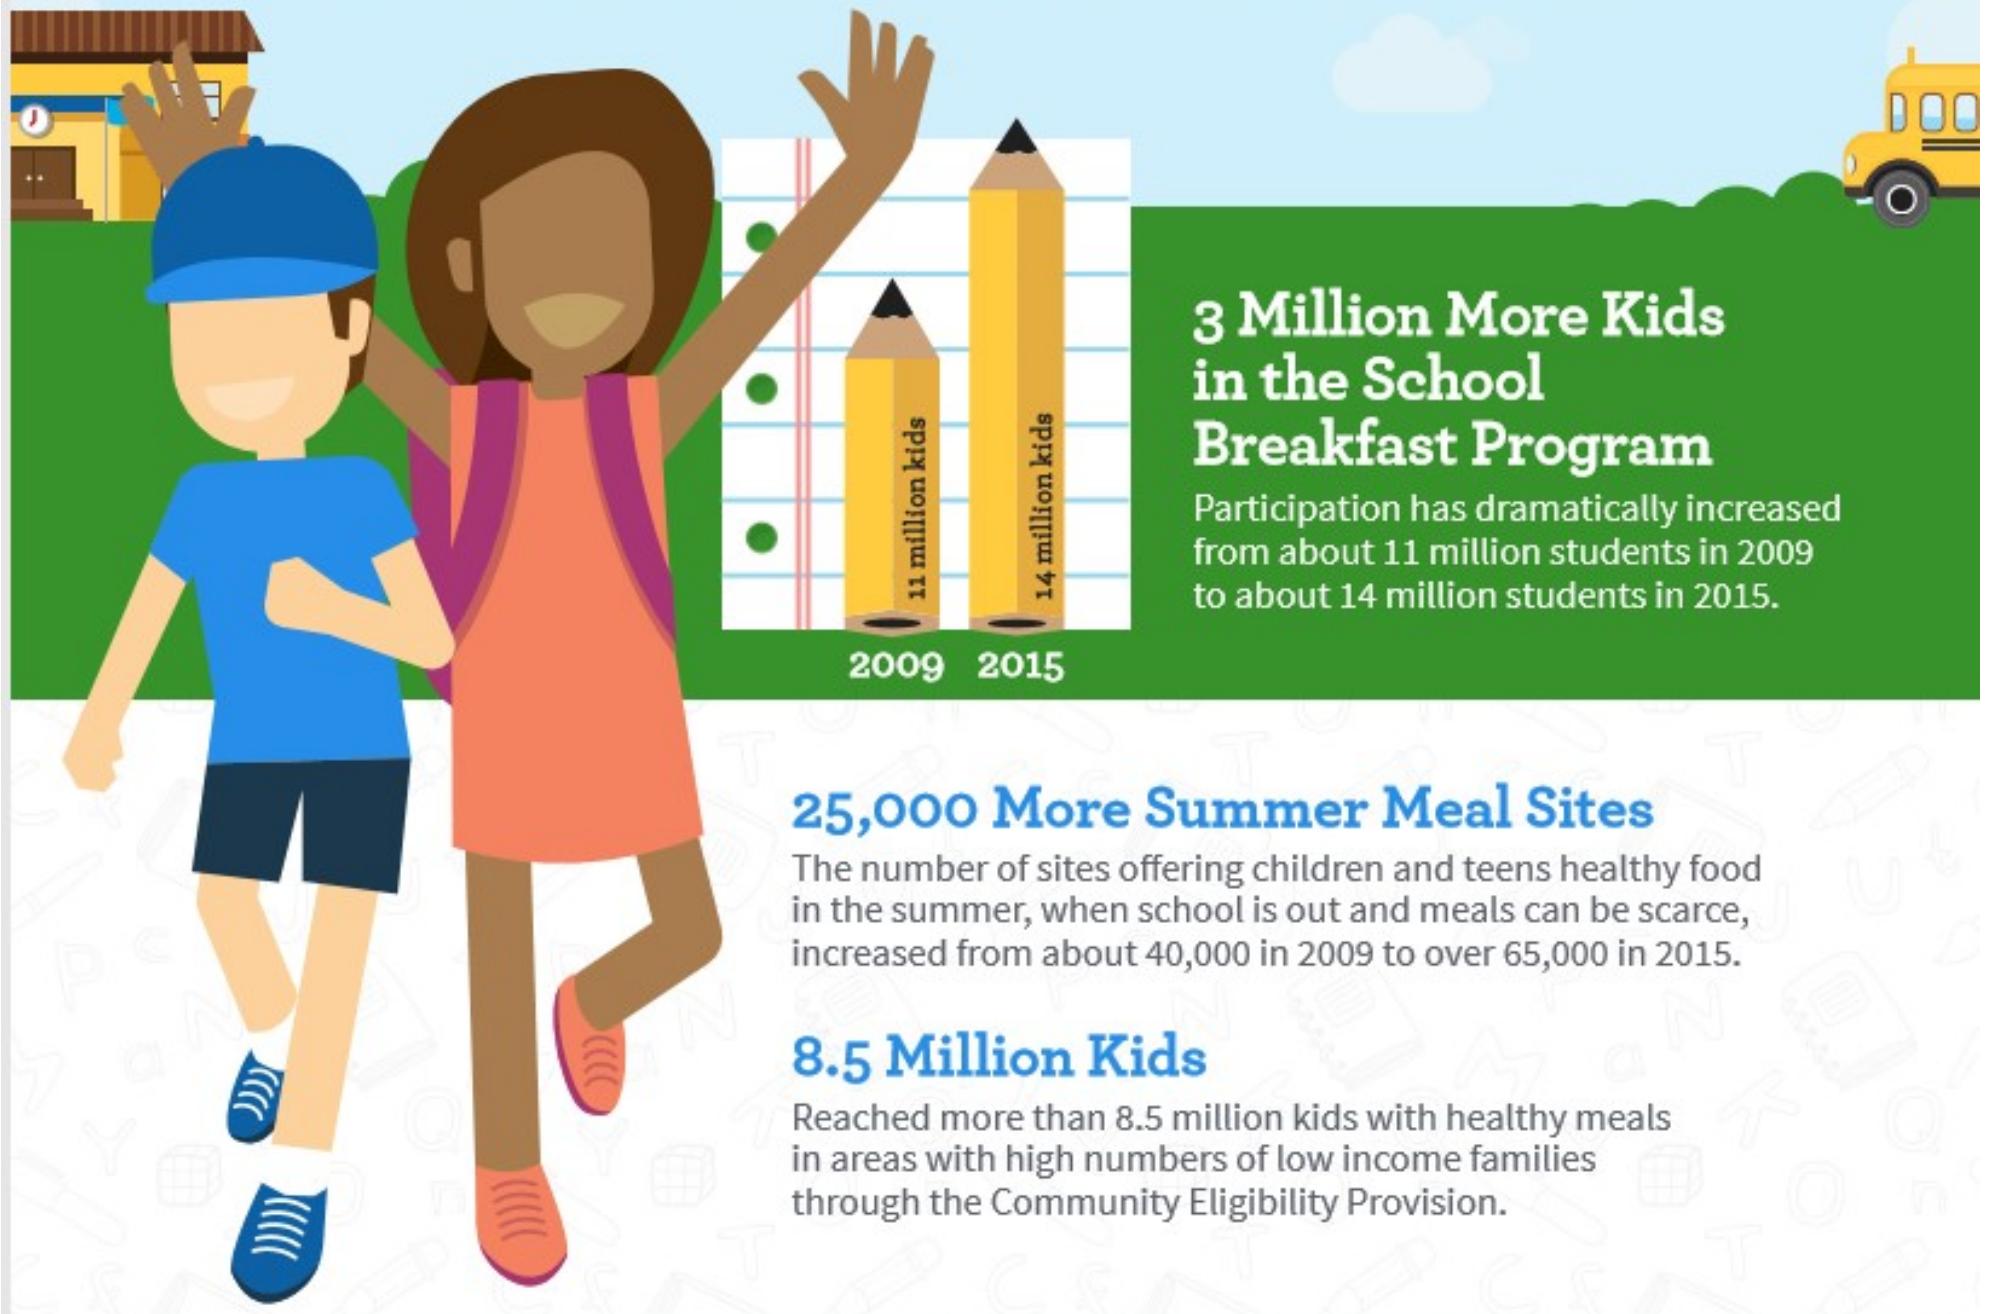

United States Department of Agriculture

The Impact and Legacy of

USDA Nutrition Programs

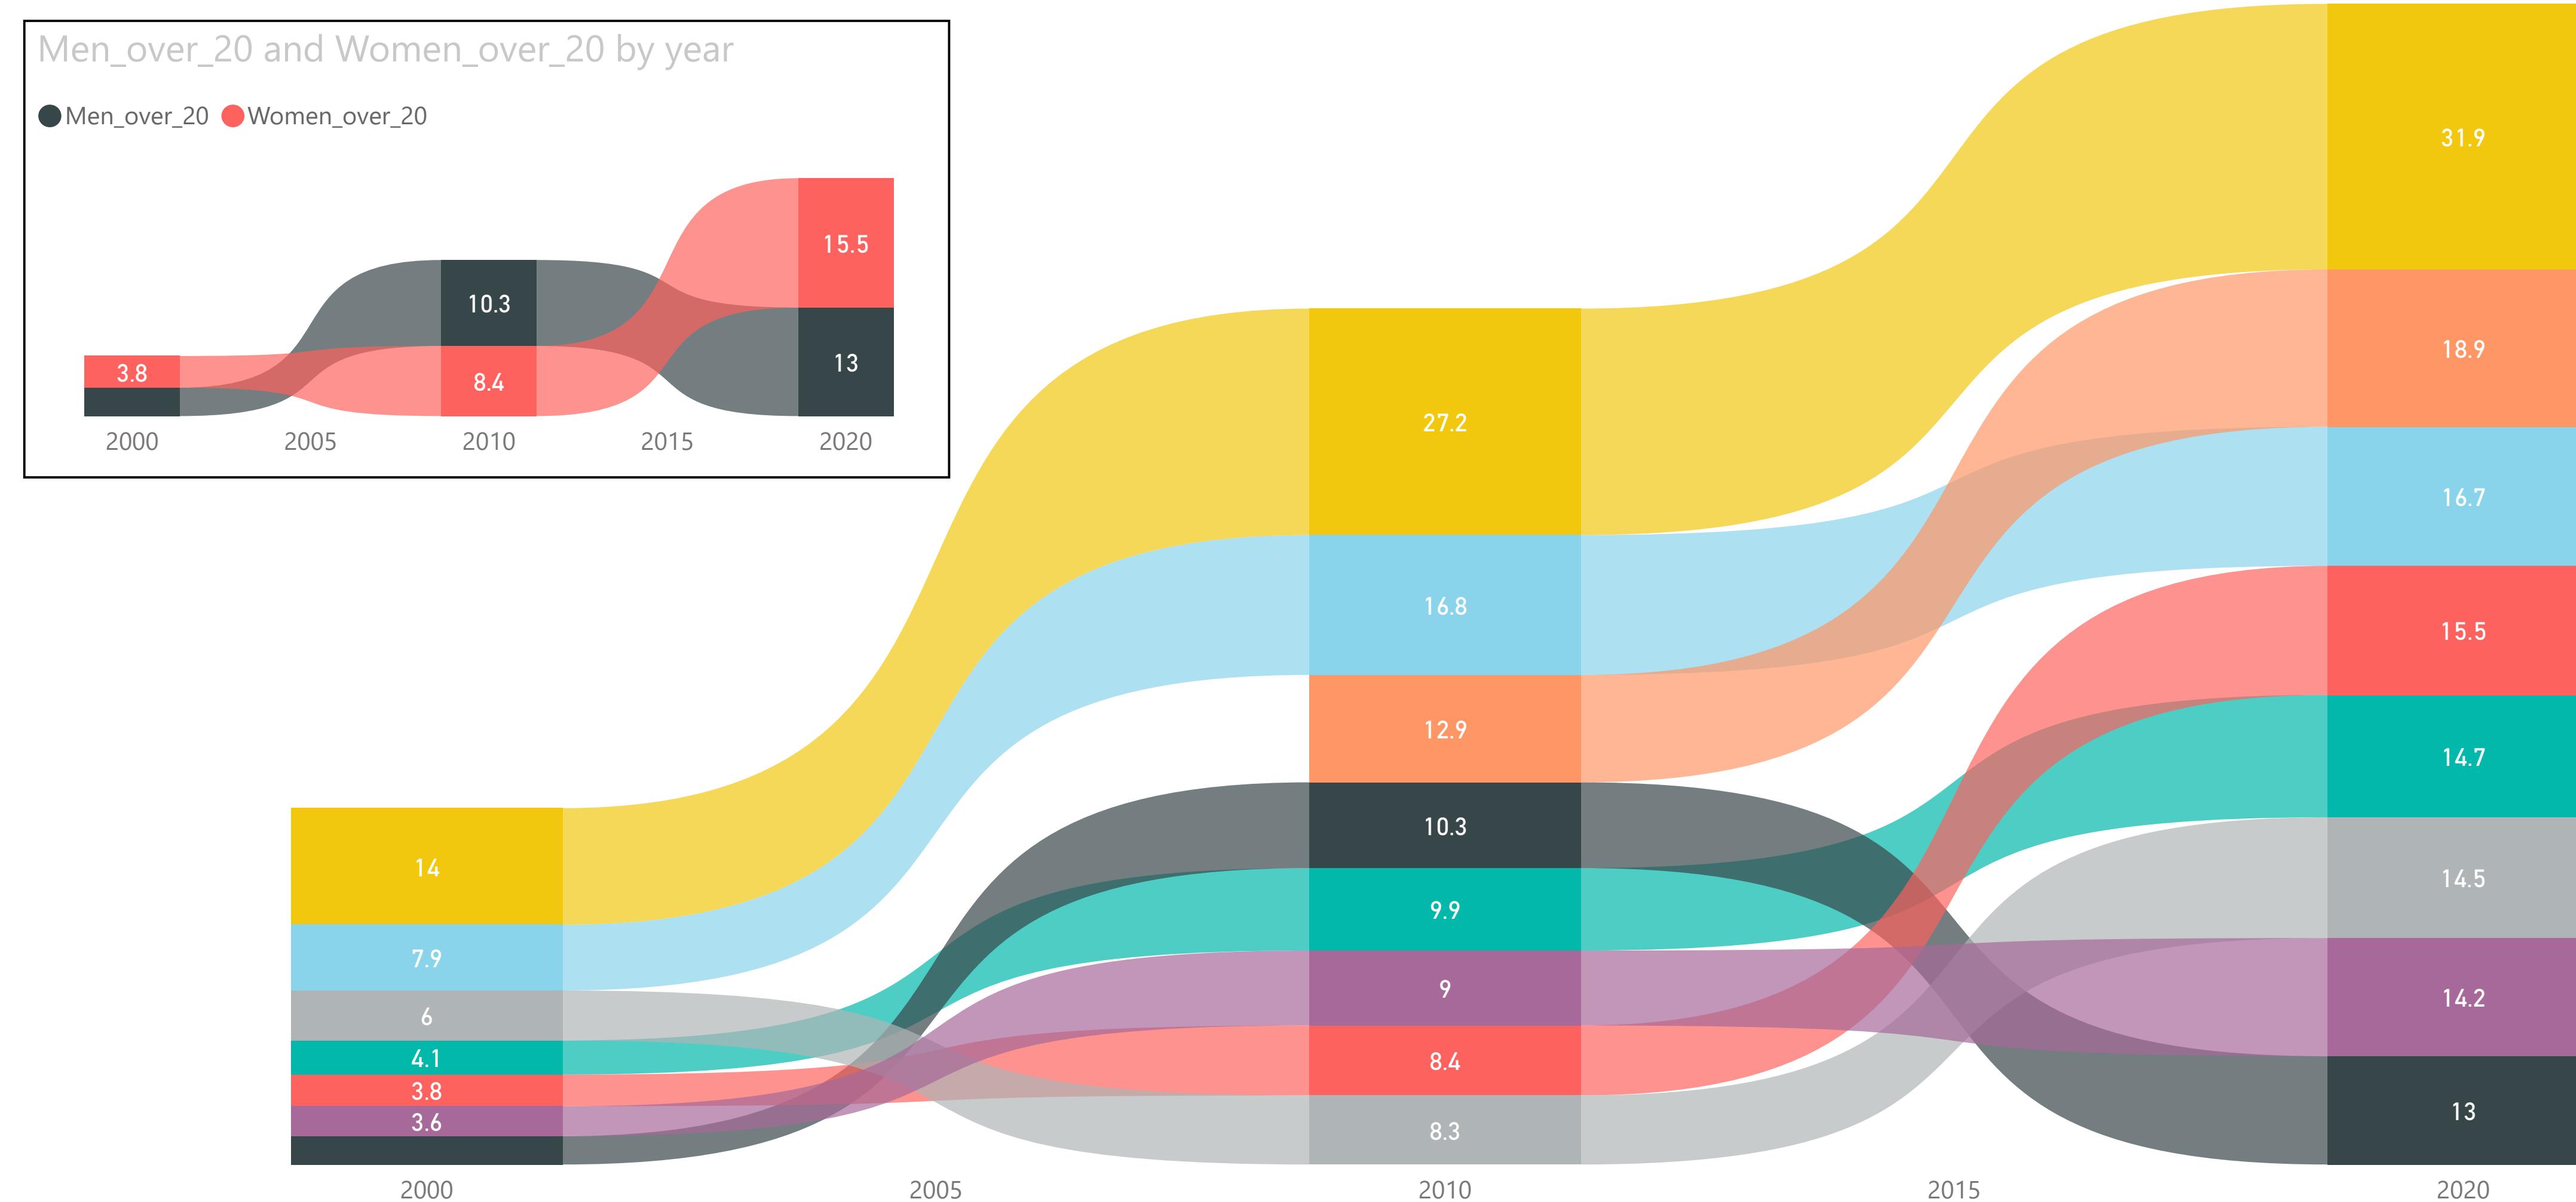

FROM 2009 TO 2016

Over the past eight years, USDA has worked to advance the federal nutrition programs, which provide a critical safety net for millions of American children and families. By expanding access to nutritious foods, the USDA nutrition programs have made a significant difference in the lives of many Americans, creating a brighter, healthier future for our nation.

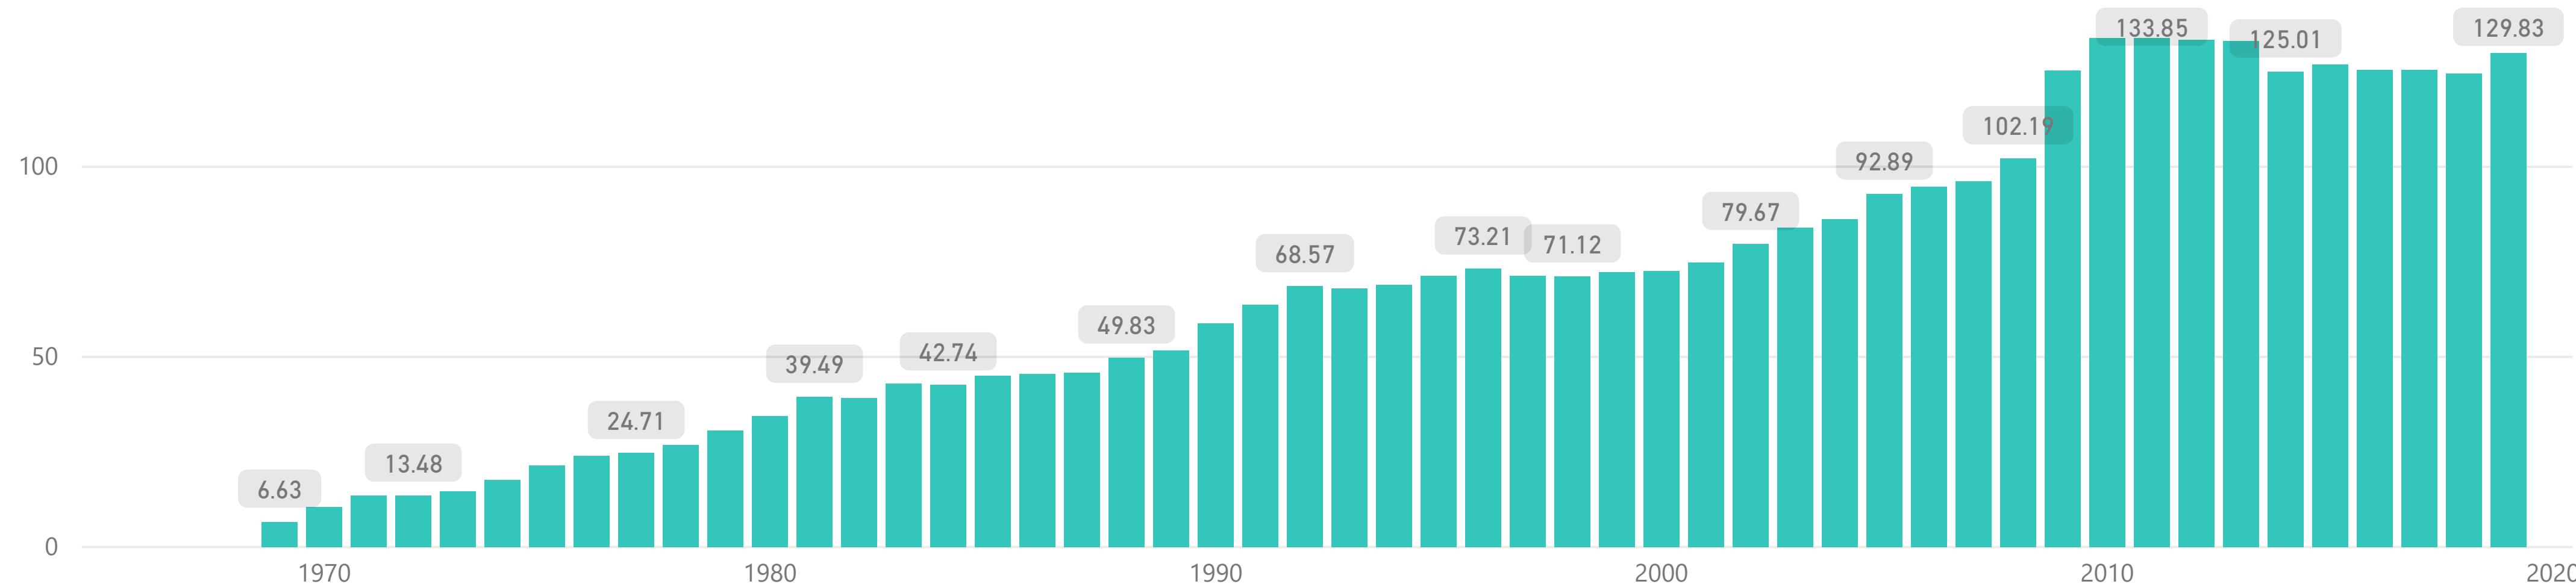

Maximum Unemployment Rate by Year (through April 2020)

● Total Civilian ● Men_over_20 ● Women_over_20 ● Teens_16to19 ● Asian ● Black ● Hispanic ● White

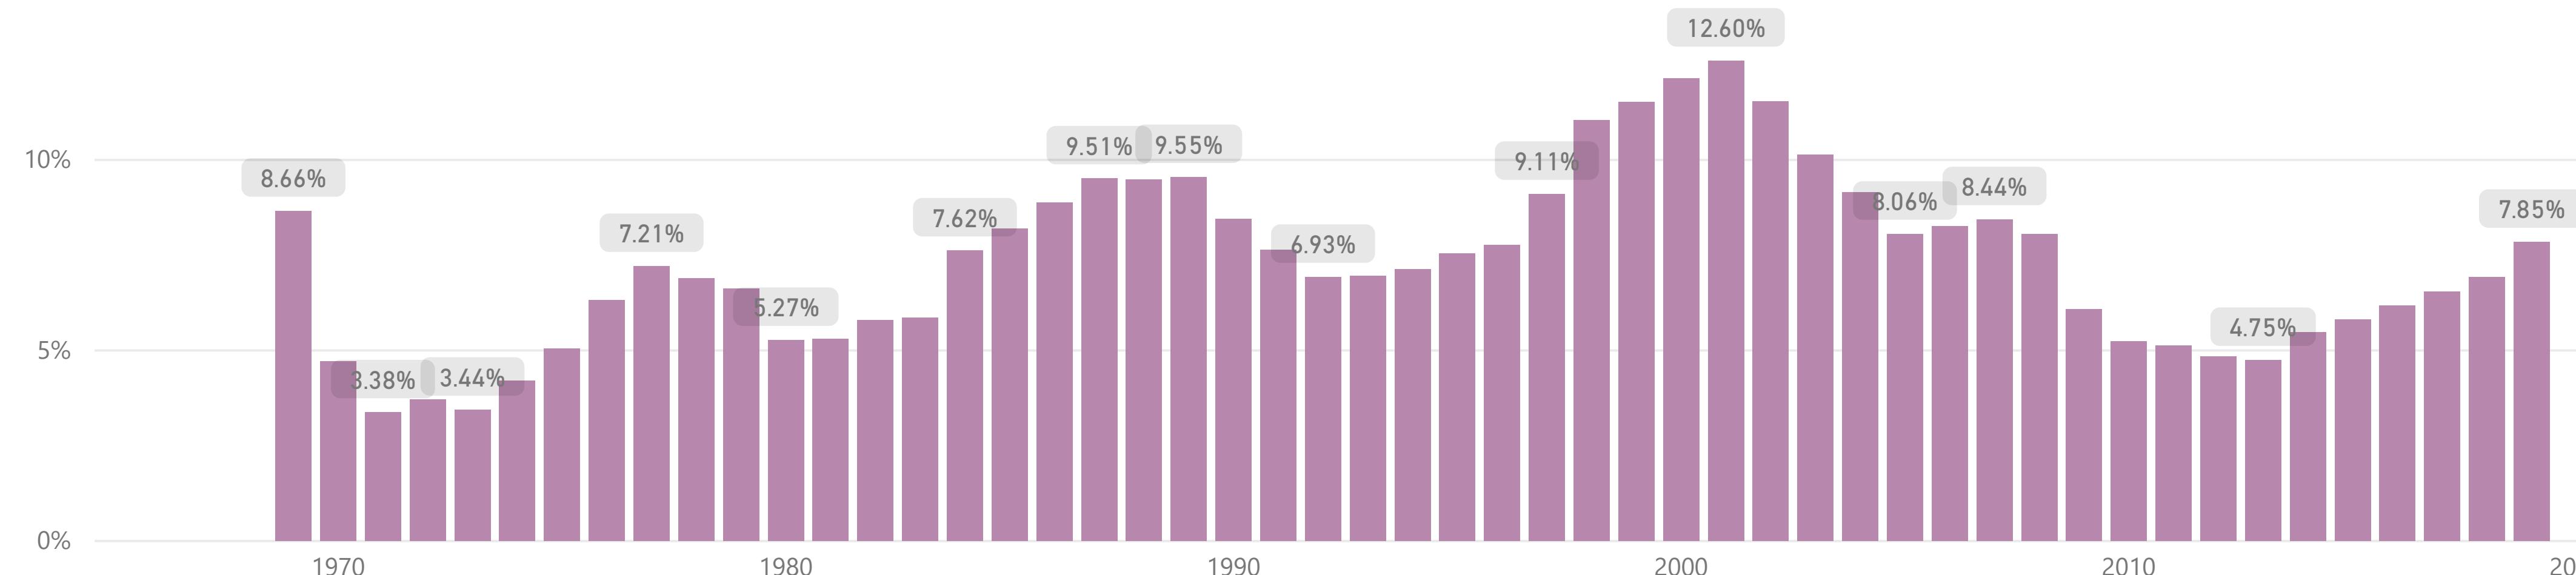

Supplemental Nutrition Assistance Program administered by the USDA (nationwide in 1974)

SNAP Benefits - Max average monthly \$ per person by year

Supplemental Nutrition Assistance Program administered by the USDA (nationwide in 1974)

SNAP Benefits - in Millions by year

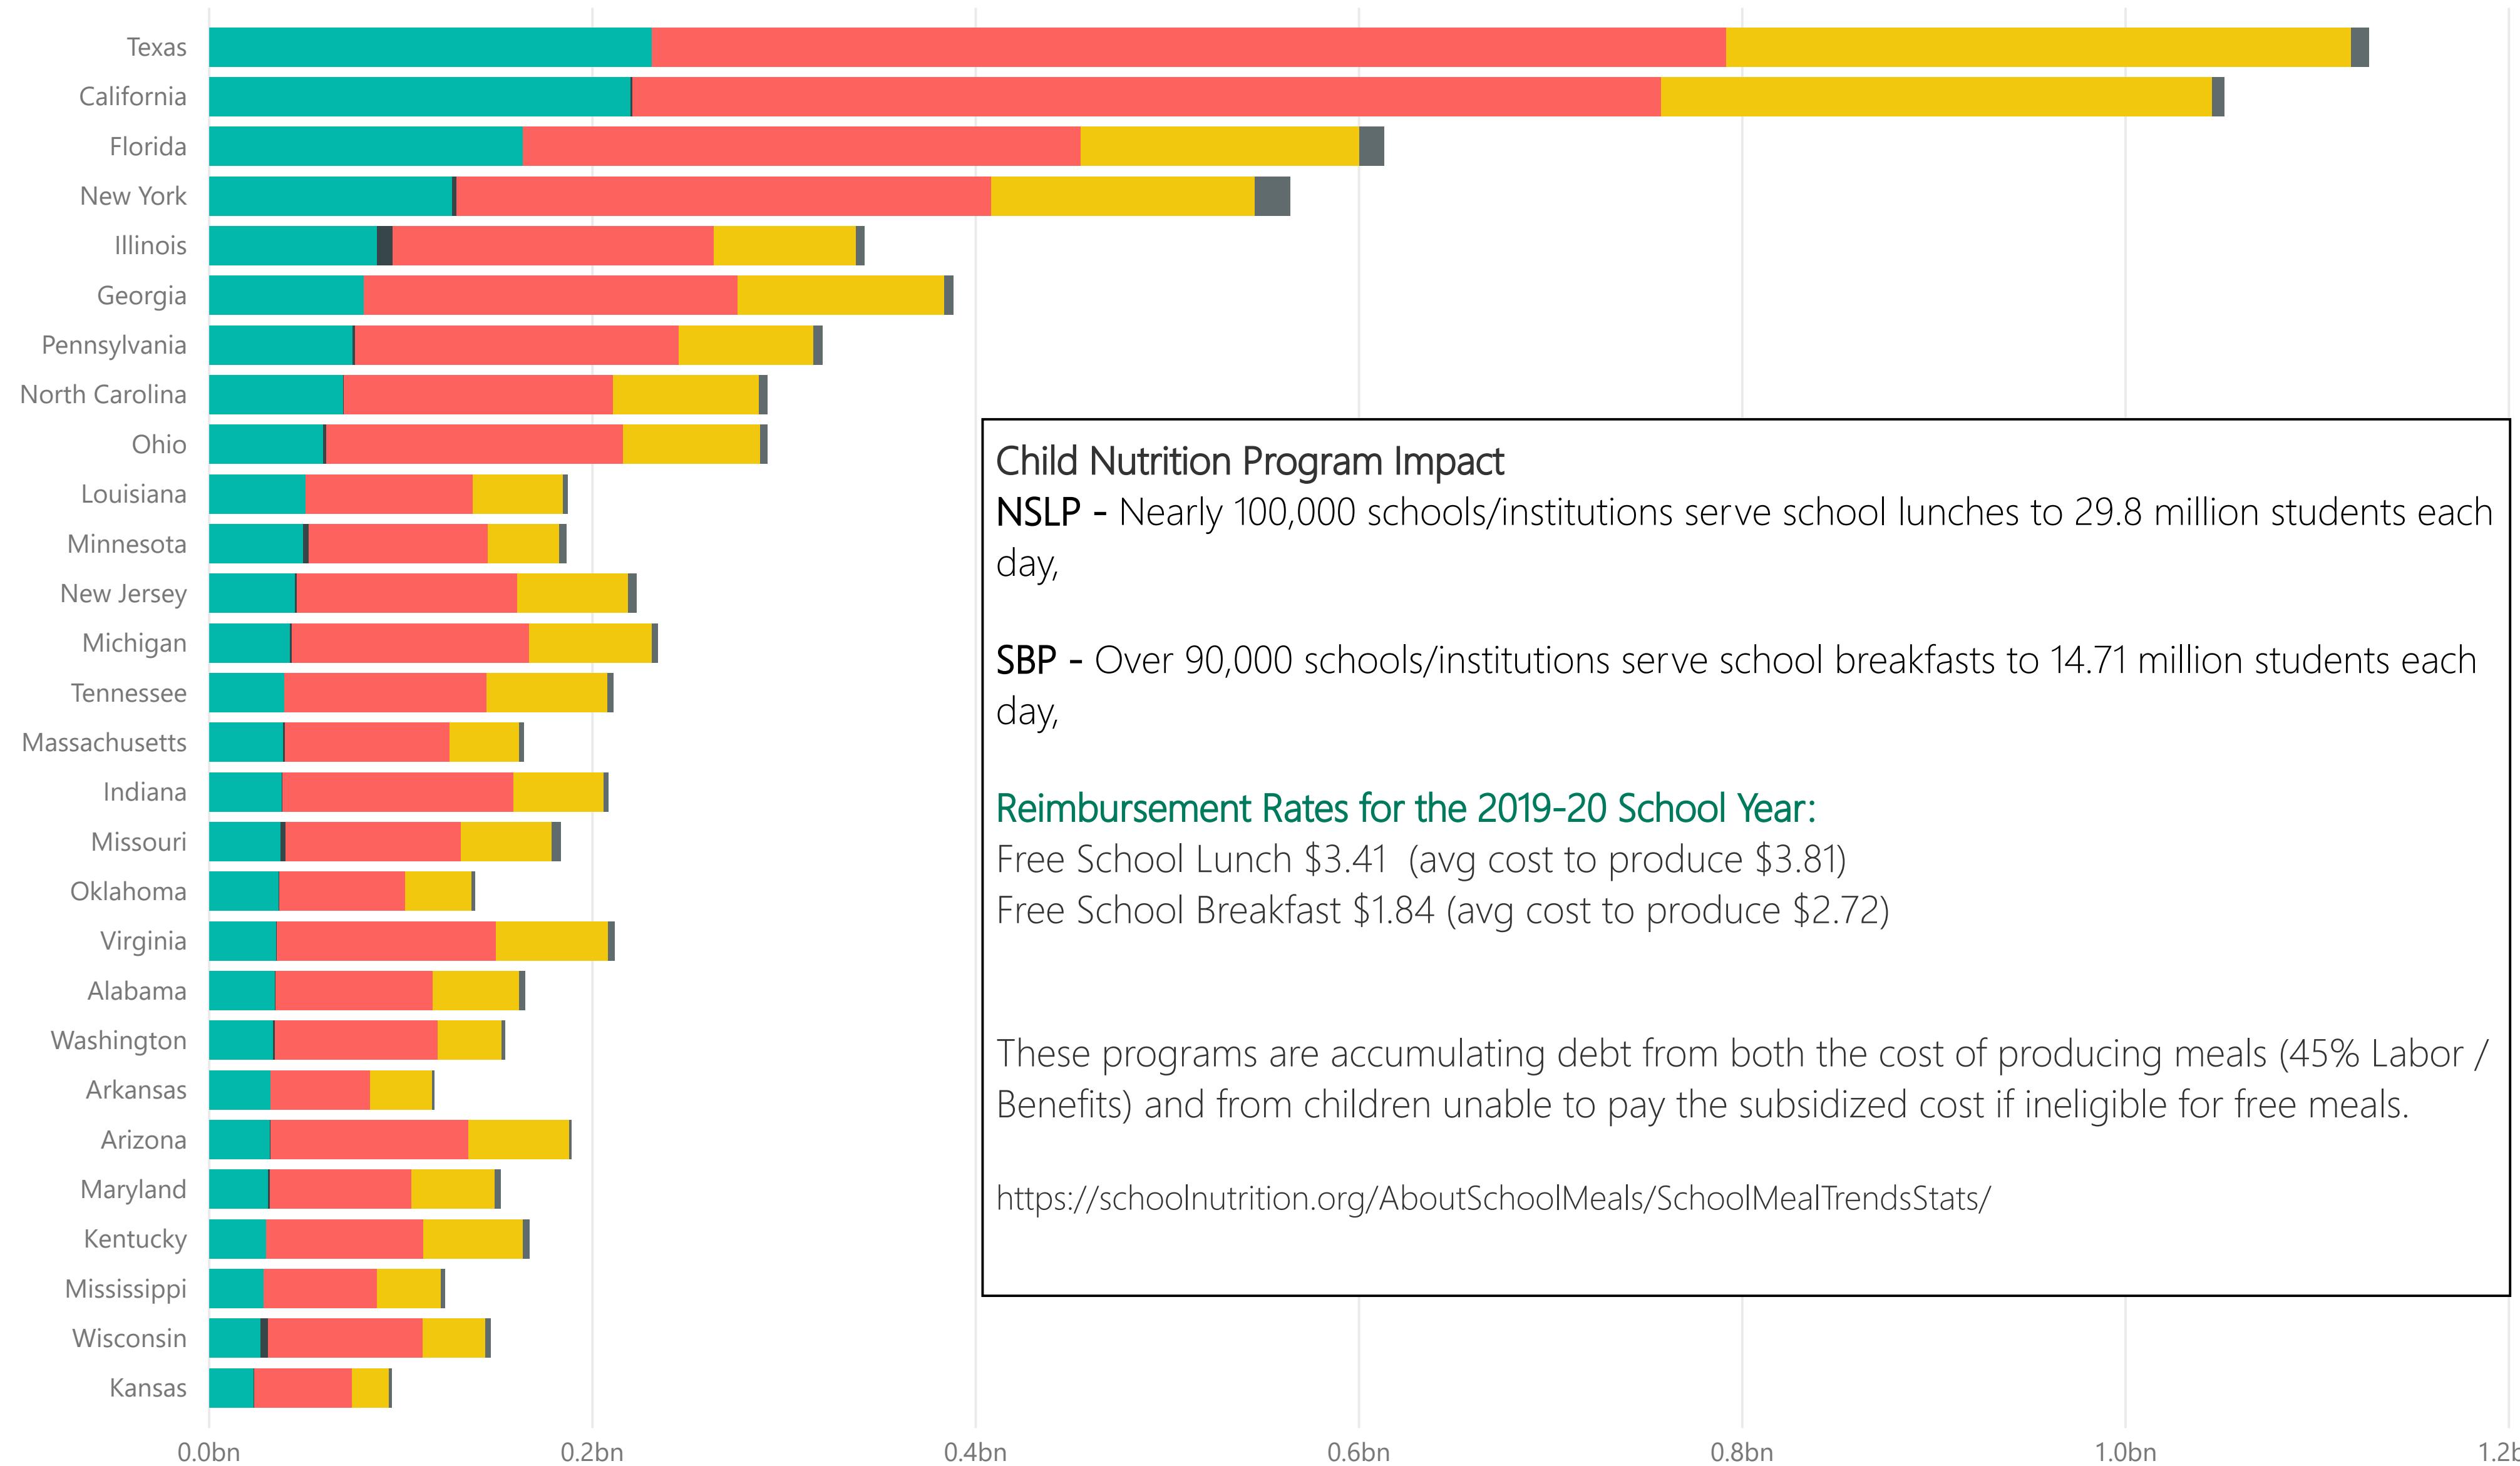

SNAP Participant Count by year (2020 as of May 8)

Child Nutrition Programs by State

● Child care or Adult care meals ● Half pint Milk program ● NSLP School Lunch count ● SBP School Breakfast count ● Summer Lunch count

Child Nutrition Program Impact

NSLP - Nearly 100,000 schools/institutions serve school lunches to 29.8 million students each day,

SBP - Over 90,000 schools/institutions serve school breakfasts to 14.71 million students each day,

Reimbursement Rates for the 2019-20 School Year:

Free School Lunch \$3.41 (avg cost to produce \$3.81)

Free School Breakfast \$1.84 (avg cost to produce \$2.72)

These programs are accumulating debt from both the cost of producing meals (45% Labor / Benefits) and from children unable to pay the subsidized cost if ineligible for free meals.

Why School Breakfast is important

The School Breakfast Program: A Smart Investment for Student Success

Too many children start their school day on an empty stomach. Whether they miss this vital meal simply due to a hectic morning schedule, or because there is not enough to eat at home, skipping breakfast comes at a high price for all students – research shows this habit negatively impacts academic performance.

Investing in school breakfast makes sense (and cents!). By contributing to improved student achievement and wellness, the federal School Breakfast Program (SBP) offers a worthy return on investment.

Research demonstrates that school breakfast consumption:

- ✓ Boosts students' academic performance, grades and test scores
- ✓ Increases concentration, alertness, comprehension and memory
- ✓ Improves classroom behavior
- ✓ Reduces absenteeism and tardiness

School breakfast participation is also linked to:

- ✓ A lower body mass index (BMI)
- ✓ Lower probability of being overweight or obese
- ✓ Improved diet quality

Federal nutrition standards ensure school breakfast offers nutritious choices including fruits, vegetables, whole grains, lean protein and low fat milk while meeting limits on calories, unhealthy fat and sodium.

SBP serves 14.7 million students each school day in approximately 90,000 public and private schools nationwide.
